Percent of all Alaska Natives represented as Shareholders in each corporation

Alaska's Native Corporations were created in 1971 to handle the money earned for native peoples through government usage of their lands and resources. There are **138,000** Alaska Natives. of which **119,300** are represented through shareholder stakes in the corporations. While individual corporations represent varying percentages of Alaska's native population, together they reflect the views and choices of over **86%** of all Alaska Native peoples.
